Description

Swiss Trac or Speed bike tour: The route starts from the car park at the fire station with a short, steep ca. 100 m climb on a tarmac road. This is easy to manage by Swiss-Trac. The route carries on with continuous up- and downhill sections. After approx. 0.5 km continue on the forest path with a high central grass verge. The circular route returns in the direction of the houses and the car park along the main village road, which has little traffic.

Type of Route

Swiss Trac Tour

E-Speedbike Tour
